What we offer ?

Smart Room Management

Mi-Fi RMS offers connected guest rooms with centralized management.The system can manage different scenarios in different room and with in the room

Creating a comfortable, inviting environment allows guests to better appreciate their room

Compatability

The system is fully compatable with the PMS such as Fidelio, Amedius, Opera, WINHMS, IDS etc.

The system can work with Mi-Fi other hospitality solutions to enhance guest experance

Optionall Use Guest Smart Phone or Tablet to controll the Room

Welcome Scenario

Welcome Scenario enable you to set custom welcome scenario for the guest

The power in the room is turned on when the guest slots the key card into the wall mounted key card switch.

The welcome mode can, be

- turn the lights on

- open the curtains

- set the thermostat to comfort mode.

What we offer ?

Energy Efficiency

LCD temperature unit enables energy efficient climate control for heating and air conditioning in hotel room applications.

Intuitive user interface allow the guest to easily set the desired temperature. Energy-saving controls promote environmental responsibility while enhancing guest comfort.

Remote controll

With the remote control, the guest can control several functions with a single touch.

Four different scenes can be created in order to adapt the room atmosphere to specific situations, like watching TV, working, relaxing, etc.

Request for house Keeping, DND etc. can be set

Exceed expectation

Guests will appreciate the option to control the lighting, curtains, temperature and fan control using the user friendly interface beside.

Option to segregate the room to different areas and set different scenes according to guest preference. Smart sensors are used to enhance guest experience further

What we offer ?

Bedside Panel

READING SCENARIO: turn lights on each side of the bed.

TV SCENARIO: appropriate light to watch TV.

SLEEPING SCENARIO: master OFF (lights, curtains, temperature in eco-mode).

CUSTOM FUNCTION: use the same interface to manage different scenes according to the time of day. This function allows energy saving and enhances guest comfort. For example, between 10 pm and 6 am, night ambiance can be activated by lowering the intensity of the light.

Lighting Path

During the night, the sensor will detect guest motion and turn on skirting lights between the sleeping area and entrance/bathroom area.
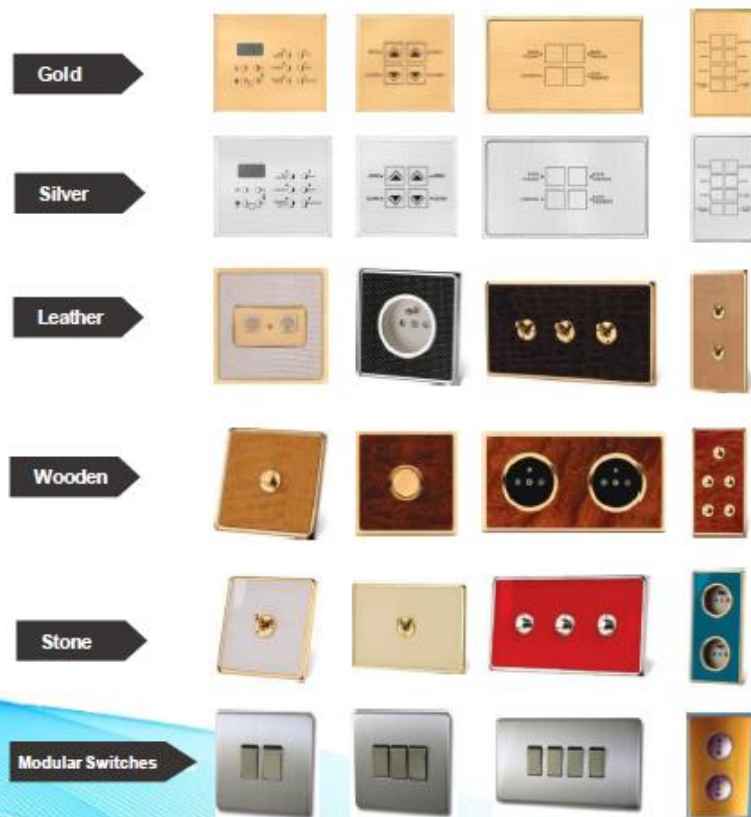

The guest does not have to turn on the lights or activate the astronomic function to go to the bathroom. It can be set up in the room in addition to the astronomic function.
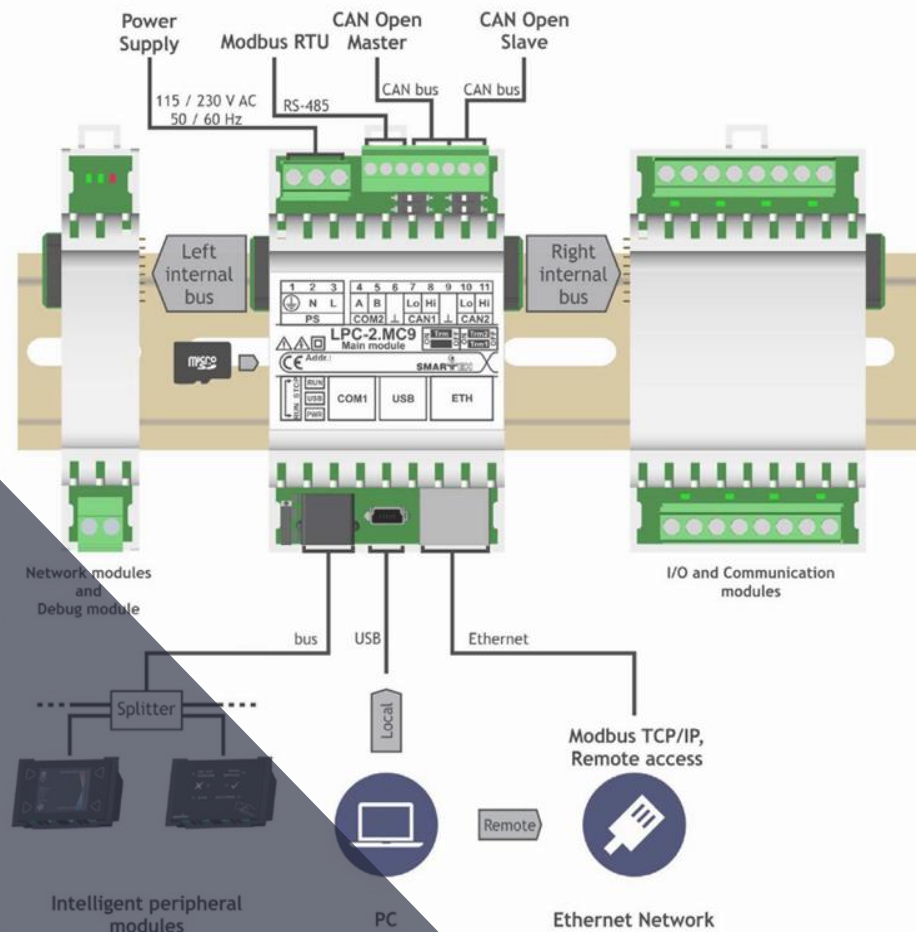

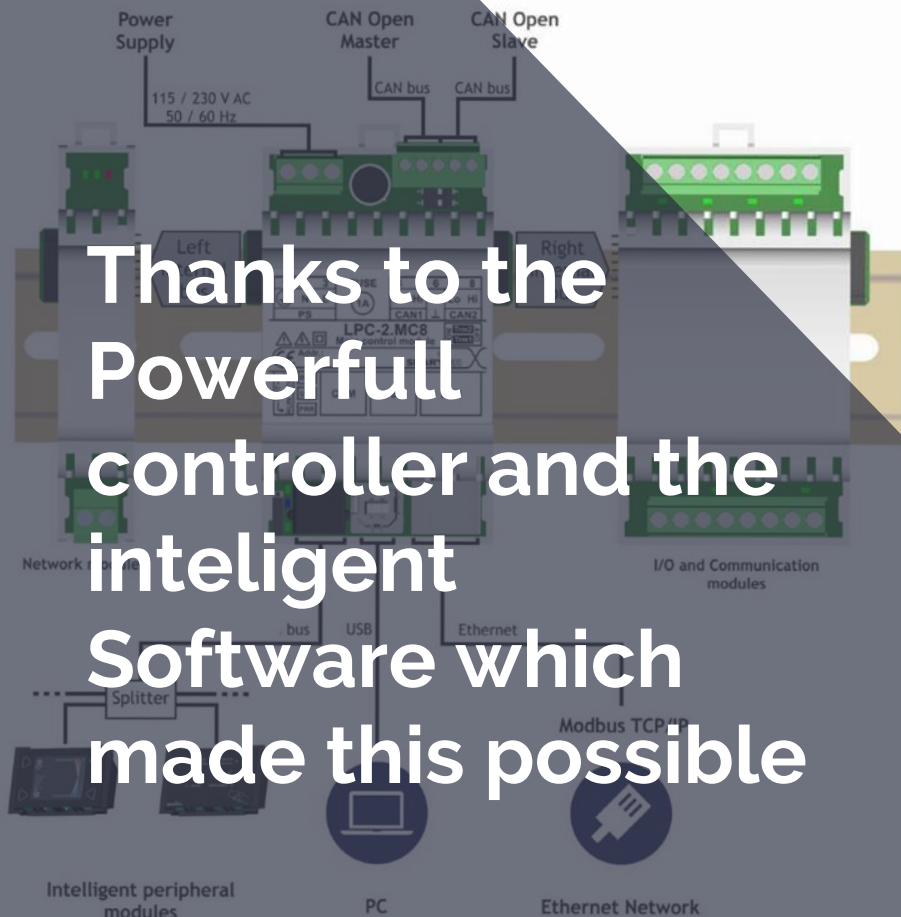

Please do not disturb
